

# Team Unbounded

Introducing.....

## Recipe Rover

"Cook, Savor, and Spice It Right: Your Kitchen Companion."

# Problem We Identified...

- How can we enhance the accuracy of recipe suggestions based solely on user-provided ingredients?
- How to improve user interactions for recipe suggestions and changes in the discussion section?
- How do we ensure food remains fresh until the designated alarm time to reduce food waste?

# HOW WE ENVISION TO SOLVE THIS

**"Elevate  
Ingredient-Based  
Recipe  
Recommendations!"**

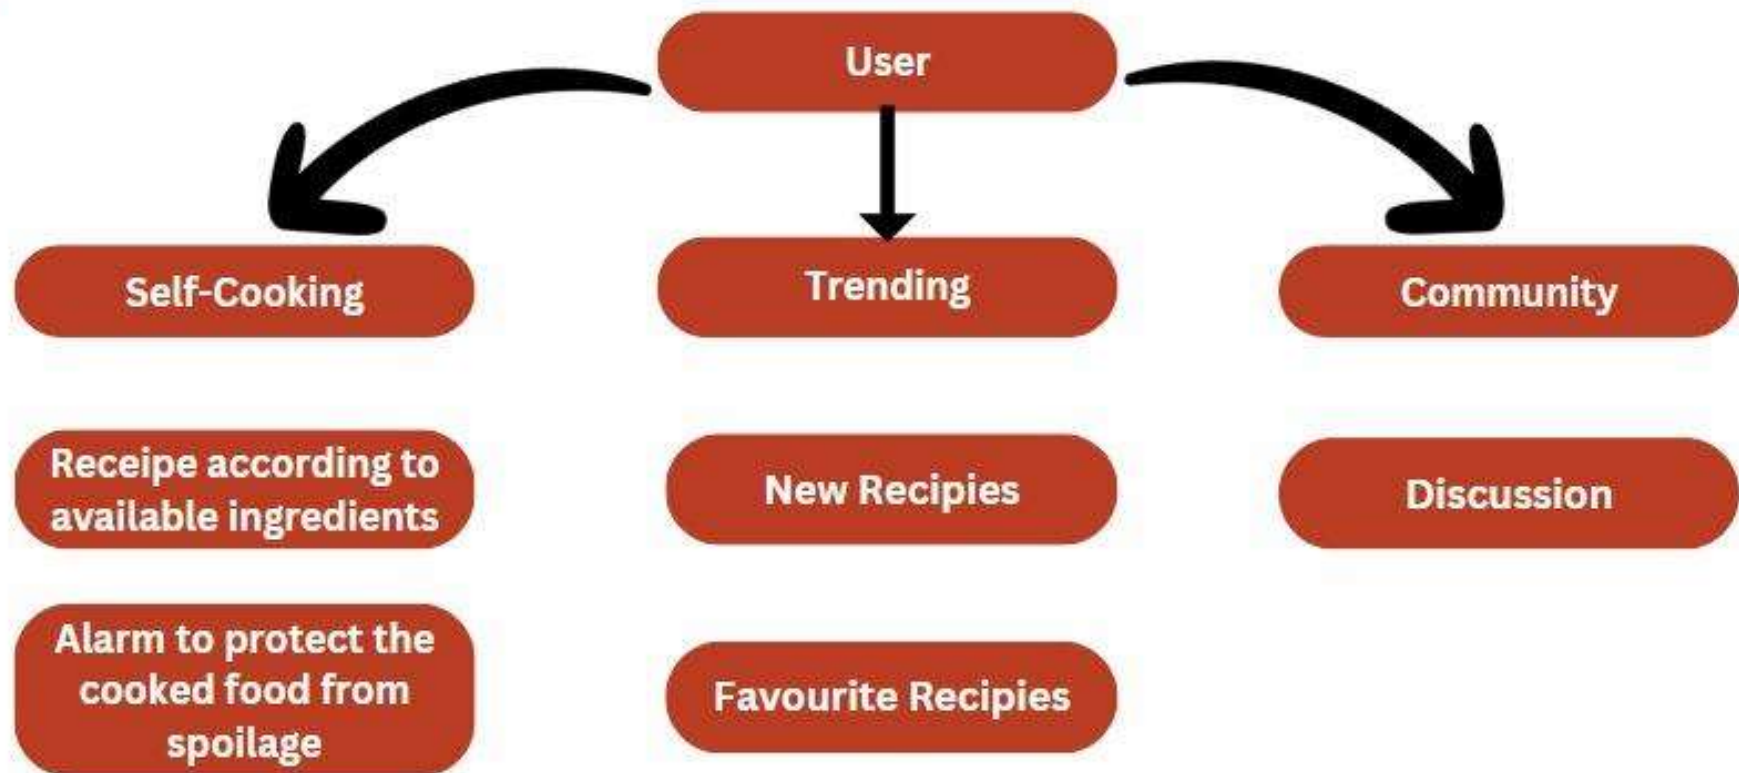

**"**

**"Upraise User  
Engagement:  
Enhancing Recipe  
Suggestions and  
Discussion Section  
Dynamism!"**

**"Preserve the  
future: Smart  
storage solutions to  
keep food fresh  
until the last  
alarm."**

## Flow Diagram | Recipe Rover

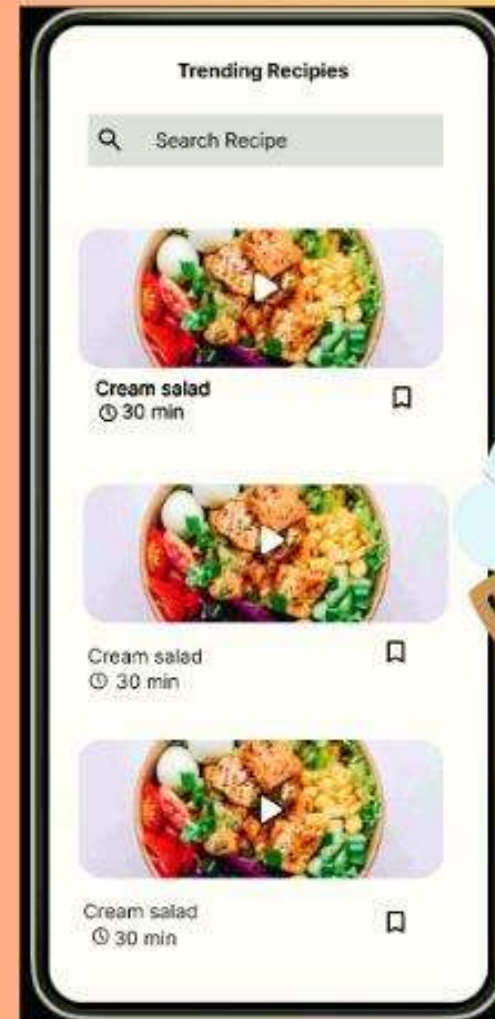

# SELF-COOKING PORTAL

- A user-friendly platform where you simply input your available ingredients, and it recommends personalized recipes you can create.
- It's your kitchen companion, providing easy, delicious solutions for every meal, reducing food waste, and making cooking enjoyable for all skill levels.
- It also monitors and notifies you about food spoilage.

# TRENDING PORTAL

- The trending box on our platform highlights the most popular and current recipes, personalized to your culinary interests
- It's a source of inspiration, bringing the latest food trends right to your kitchen.
- Whether you're a seasoned chef or a beginner, it's your go-to place for discovering and trying out trending dishes.

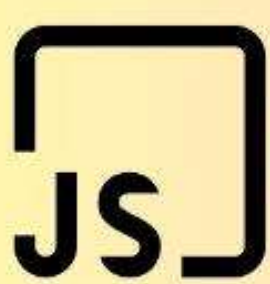

# DISCUSSION PORTAL

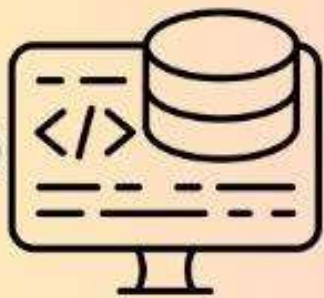

- Talk about your experiences in making recipes, share your own unique approaches.
- Discuss any problems or challenges you encounter during the cooking process.
- This interactive environment fosters a sense of community and collaboration among individuals allowing them to collectively problem-solve issues that arise when preparing dishes.
- The discussion box serves as a valuable resource for culinary enthusiasts to connect and enhance their cooking skills.
